This Communications Specialist course is designed to meet all the needs for recovery, rescue, training, or special operations events. The content in the modules cover a wide variety of material related to transmitting and receiving communications for any situation the team might inherit. The main purpose is to ensure that communications is continuous from pre-deployment, deployment, de-mobilization, and readiness. All times in the training modules are designed with buffers (each day has a one-hour buffer) so time can be added or subtracted based on the student's overall skills and comprehension.

Topics include:

- FEMA Documentation and Forms
- Telecommunications
- Radio 's and Radio systems
- Satellite
- Internet and World Wide Web
- Antenna systems
- Power sources
- GPS, Mapping
- & Interoperability Equipment
